

People on the move

Airline travel? No problem! We designed a wheelchair so portable it fits into aircraft overhead storage lockers (and the boot of your car!)

TIGA FX folds into a briefcase style shape, ideal for storage in tight spaces. Small car, no issue. Air craft storage, no issue. The TIGA FX easily fits into the overhead luggage compartment.

Our Q-lock system ensures all the benefits of a folding chair without compromising strength. The system is simple, clean and streamlined enough to meet all your travel needs.

A folding chair that is lightweight and rigid - For people on the move.
