XENON[®] SA

Generation 2013

The lightest folding wheelchair in the world,
now with swing-away legrests - Just got better

XENON[®] SA

The lightest **FOLDING** wheelchair in the world, now with swing-away legrests.

Quickie has combined the latest ultra-light, hydroformed aluminium technology, design and engineering to create the Xenon SA - **the lightest folding wheelchair in the world with swing-away legrests.**

At just **under 9.7kg***, and with innovative cross brace folding technology, Xenon SA is easy to fold, lift and transport. It has also been cleverly designed to create the kind of minimalistic style that you would expect from a rigid chair.

With high-end design and innovative technology, Xenon SA provides a lightweight, **energy efficient driving and handling experience.**

Xenon SA looks and performs like a rigid chair with the benefits of a folding swing-away chair - simply perfect.

* 40 x 40 cm; low frame; slim style sideguards; 24" Proton wheels + aluminium handrims; 3" castors; angle adjustable back; 35 cm fixed height backrest; compact wheel lock; no pushhandles + lightweight backrest upholstery; flip-up footrest

The invisible castor fork adjustment is a patented mechanism that hides the fork and angle adjustment inside the castor tube. Easy adjustment, efficient performance and smooth styling!

Easy access, effortless folding and lightweight lifting, providing freedom and independence for an active lifestyle.

Weighing just under **7.4kg** without its quick release wheels and footrest, the ultra-light Xenon SA has revolutionised wheelchair lifting and transporting.

Incorporating the **new patented Dynamic Folding System and the Quickie Locking System**, Xenon SA can be folded in seconds with just one hand.

Xenon SA locks automatically in the folded position with the Quickie Locking System. To unfold simply press one lever and the Dynamic Folding System starts the unfolding process.

The cross brace has been cleverly designed to sit neatly under the seat, leaving a minimalistic, open frame that has all the style of a rigid chair.

Xenon SA is legally protected to ensure it remains unique for you ...

XENON[®] SA

New for Generation 2013

At Quickie, we pride ourselves on the quality of our products. That's why the Quickie Xenon SA Generation 2013 has an improved option range, product enhancements and better performance.

Carbotecture® forks

Carbotecture® forks are the new standard. They are stiff and rigid, and **50% lighter** than the previous aluminium forks, not only making the chair lighter but also increasing overall rolling efficiency and performance.

Carbon fibre options

Make your chair as light as possible by choosing from a range of carbon fibre accessories, including the stylish angle and depth adjustable footboard and slim style side guard.

12-spoke spinergy wheels

Just as strong as the 18-spoke version but with a more stylish appearance. Solid tyres option is now available on Spinergy and Proton wheels.

One arm fork

Strong and modern design for a stylish and attractive look. Available in a choice of three anodised colours; orange, black and silver.

New backrest upholstery

Improved stitching provides a new sleek design and slimmer look. We have also added a zip pocket.

Improved folding x-hinge

The new improved folding performance and better handling thanks to the new, innovative x-hinge.

Select from a wide range of options to create your own Xenon SA and pick from more than 20 colours to customise each component in any combination.

NEW swing-away legrests

New lightweight aluminium tubing for a firm and rigid performance. Available as 70° and 80°.

NEW desk side guard

The new desk side guard with improved stability and more flexibility can be colour-matched to any frame colour. The armpad can be moved 4cm forwards.

NEW release mechanism

Innovative release mechanism for left and right operation swings the legrest in and out for easier access.

Quickie locking system

The innovative and patented Quickie Locking System makes the Xenon SA easy to handle, provides the smallest possible folding package and can also be used by people without finger function.

Dynamic folding system

Supports easy one hand opening by simply pressing one lever.

IMPROVED lightweight back angle adjustment

Xenon SA offers stylish designer backrest solutions integrated into the flow of the frame. 90° fixed and angle adjustable backrests that are easy and quick to adjust from -15° to +18° in 3° increments.

Proton quick-release wheels

The combined weight of the wheel, handrim, axle and Schwalbe Speedrun tyre is just 2.25kg per pair - saving over a kilogram on traditional wheels.

NEW IMPROVED ergonomic compact wheel locks

Minimalistic and easy to lock, the wheel locks can be screwed directly to the frame (on 0° and 2° wheel camber only). Also suitable for quadriplegics.

Standard axle adapter

Offers two centre of gravity positions, camber [0°; 2°; 4°] and adjustable wheel spacing - all in one lightweight piece with quick adjustability through just two screws.

Lightweight axle adapter

Loosen one screw on each side, turn and switch the asymmetric axle sleeves from right to left to achieve a centre of gravity change of 2cm.

Divided footplates

Colour-matched to your wheelchair, with integrated angle and depth adjustment for perfect adjustability.

Platform footrest

Available with the performance (aluminium), composite and carbon fibre footboard, the lightest available footrest solution offers full transfer space with the one side flip-up mechanism.
